

VNAGY CC BY-NC-ND 4.0 License – Code Edition (2026)

Author: Viktorija Nađ

1. Scope

This license applies exclusively to the source code contained in the VNAGY project. All diagrams, visuals, architectures, documentation, and other materials may be licensed separately.

2. Allowed Actions

You may:

- * view the code
- * study the code
- * analyze the code for personal or educational purposes

No other permissions are granted.

3. Attribution Requirement (BY)

Any permitted use must clearly state:
"Source code created by Viktorija Nađ (2026)"

Attribution must remain visible, intact, and unmodified.

4. Non-Commercial Restriction (NC)

You may not use the code for commercial purposes.
This includes, but is not limited to:

- * selling the code
- * integrating the code into commercial products
- * using the code in paid services
- * using the code in enterprise or business environments
- * using the code in commercial cybersecurity tools or frameworks

Commercial use requires explicit written permission from Viktorija Nađ.

5. No Derivatives (ND)

You may not:

- * modify the code
- * alter the code
- * create derivative works
- * rebrand or repurpose the code

- * integrate the code into other software
- * upload modified versions anywhere
- * redistribute modified or unmodified versions

The code must remain exactly as originally published.

6. Redistribution Prohibition

You may not:

- * redistribute the code
- * upload it to other repositories
- * share it publicly or privately
- * include it in any package, module, or library

Redistribution requires written permission.

7. Integrity of Author Markings

You may not remove:

- * author name
- * copyright notices
- * VNAGY identifiers
- * version tags
- * license headers

All original markings must remain intact.

8. Liability

The code is provided “as is,” without warranty.
The author is not responsible for any damages or misuse.

9. Final Provisions

This license is effective from 2026.
All rights not explicitly granted are reserved by Viktorija Nađ.
Unauthorized use constitutes a violation of intellectual property rights.
